My Visit to The Leonardo Museum
I am going to visit The Leonardo Museum today.

This is what our building looks like. We have one entrance where there is a big pink sign above our entrance doors.
When I walk through our doors, I may have to wait in line. I will wait patiently for my turn.

Then Museum Staff or my parent will put a stamp on my hand. I will feel the stamp press on my hand, and it will not hurt.
The Museum Staff wear pink shirts and have name badges. I can show my hand stamp to the Museum Staff when entering.

Museum Staff are adults I can learn from at The Leonardo, and they can answer my questions or help me if I get lost.
My Family and I will decide what to see at the Museum. I can let my family know what I would like to see.

I may not have time to see everything.

I will try to cooperate with my family and that way we will have fun.
One exhibit that we might visit is FLIGHT. In this room there is a C-131 plane and lots of fun activities to do.

There is also a slide inside the C-131 plane that I can use to get out of the plane but I may have to wait my turn.

I can watch a video about people trying to learn how to fly. I can turn a wheel to make the blades move and make a paper helicopter and test it out in the wind tunnel.
Another exhibit that we might visit is the ART STUDIO.

Here I can color, paint, or create something to take home with me.

There is also a green screen where I can hold up different green objects and see myself disappear.
To get upstairs, I can either take the escalators which are like stairs or use the elevator.

If I take the elevator, I may have to wait my turn because it may be crowded.
Another exhibit that I can visit is **LEONARDO’S SCIENCE LAB**. In **LEONARDO’S SCIENCE LAB** I can explore what experiments we are doing for the day.

I can also play with the Theremin which can make some loud sounds.
Another exhibit is we might visit is LEONARDO’S WORKSHOP.

In LEONARDO’S WORKSHOP I will have many choices. I can build with Brackitz or the globes.

I can put together a marble track on the Marble Track Wall.

I can also use string to make a shape using the pegs on the wall.
Another exhibit we might visit is PERCEPTION.

In PERCEPTION I can look at different types of illusions.
Another exhibit that my family and I can visit is ALIVE.

In ALIVE, I can use my nose to smell different scents. I can use my eyes in the blacklight room to see what turns white.

I can test out different types of workout equipment. I can also watch videos while sitting on couches.
If the Museum gets too loud, my family and I can find a quiet space on the first floor in the South Classroom.

In the quiet space, I can relax on bean bags. It may be a little darker in that space.
At the end of the visit, I will leave The Leonardo and walk out the doors I came in front.

I had a great day at The Leonardo Museum!
